ABA WEE WUL Link

Form 40

Link Additional Water Shares and Water-Use Licences/Registrations to an Allocation Account

- *De-link water shares from allocation accounts and link them to a nominated allocation account*
- *Link water-use licences/registrations to a nominated allocation account*
- *Trade the remaining balance from allocation accounts into the nominated allocation account*

A Nominated allocation account

State the allocation account you wish to link the water shares and water-use licences/registrations to.

A	B	A						

All future allocation will be owned by the holder(s) of the nominated allocation account.

B Related water shares

List all additional water shares that are to be linked to the nominated allocation account by this application.

All the owners of these water shares must sign section E.

1.	W	E	E						
2.	W	E	E						
3.	W	E	E						
4.	W	E	E						
5.	W	E	E						
6.	W	E	E						
7.	W	E	E						
8.	W	E	E

Explanatory notes

Allocation ownership
The holders of the allocation account nominated in this application will be the owners of all allocation in that account. This includes all allocation traded into the account through this application, and future allocation derived from all water shares linked to the account.

Minimising the overall application fee to be charged
The application fee is equivalent to the current allocation trade fee for each water share and for each water-use licence/ registration added to the allocation account. In addition, each allocation trade also attracts an additional allocation trade fee. Therefore, the allocation account you nominate can impact the overall application fee. You may wish to confirm with your water corporation how the overall fee can be minimised.

Water shares that may be included
Only water shares with trading zones that are the same as the nominated allocation account can be included. Contact your water corporation if you are unsure that the water share's trading zone is the same as the nominated allocation account.

Who must sign this application form?
This application must be signed by:

- All owners of each water share being added to nominated allocation account;
- One of the holders of each water-use licence/ water-use registration being added to allocation account;
- All of the holders of the allocation accounts where allocation trades have been nominated; and
- All holders of the nominated allocation account.

This is necessary because:

- The water share owners are giving the future allocation from their water shares to the holders of the nominated allocation account ;
- At least one holder of each water-use licence/ registration must consent to the use of that water on their land;
- The holders of the allocation account(s) or their authorised agents are applying to have their remaining allocation balance transferred to the holders of the nominated allocation account; and
- The nominated allocation account holders are applying to have additional water shares and/or water-use licence/ water-use registrations linked their account.

Each person only needs to sign once, even if they own more than one water share and/ or are a holder of more than one water-use licences/ registration or applying to trade allocation from more than one allocation account.

If a water share owner or a water-use licence/ registration holder is a company, two directors or one director and secretary are required to sign. An ASIC company extract not more than 12 months old must also be attached. A company extract is available from www.asic.gov.au.

If a water share owner or water-use licence/ registration holder is an incorporated association, the listed secretary is required to sign. An incorporated association extract that is less than 12 months old must also be attached. An incorporated association extract is available from www.consumer.vic.gov.au.

Holders and authorised agents of the allocation account
This application does not change the allocation account holders or authorised agents.

Rescinding any link created by this application
To rescind this approval for a given water share or water-use licence/ registration, the respective owners must apply to link the water share or water-use licence/ registration to another allocation account. This is done via an application to transfer or vary the water share (a Form 1 or Form 9 application), or via an application to vary the water-use licence/ registration (a Form 24 application).

What is happening under the Water Act 1989
This form is an application, where applicable, for the Minister's approval to:

- give a water allocation assignment (under section 33X);
- take water outside the associated water system (under section 33AI);
- use water on land with which the water share is not associated (under section 64K);
- give a standing direction (under section 33TA); and/ or
- revoke a standing direction (under section 33TB).
