## EXPLANATORY NOTES: APPLICATION TO DIVIDE A WATER SHARE

### General

1. A division of a water share will cancel the original share and create new water shares, and their total volume will equal that of the original share.
2. The attributes, associations, and ownership of the original water share are transferred onto the new water shares. These include the Allocation Bank Account, water system source, reliability type, trading zone source and use, Water Corporation and delivery system, and the water-use licence. The attributes, association, and ownership excluding allocation bank account details are detailed in the water share copy of record.
3. The new water share will be linked to the same ABA as the original water share. This means that if the water share is linked to an ABA you are not a holder of, you are giving future allocation from the water share to the person(s) named on the ABA.
4. If there is a mortgage and/or limited term transfer on the water share to be divided, the mortgage or limited term transfer will remain on each of the water shares once divided.
5. If you do not wish to have a limited term transfer carried forward onto the new water shares, the holder of the limited term transfer would first need to terminate the limited term transfer. Similarly, if you do not wish for a mortgage to be carried over to the new shares the mortgage would first need to be discharged.
6. Any limitation on seasonal allocation as a result of carryover held on the original water share will be transferred pro-rata to the resulting water shares.
7. Only the recorded owners of a water share or their legal personal representatives can apply to divide water shares. If an owner is a company, Annexure 3 must be completed and must be accompanied by an ASIC company extract not more than 12 months old.
8. All notices and invoices will be sent to the postal address of the person or company first listed in the water register.
