EXPLANATORY NOTES: APPLICATION FOR ISSUE OF A WATER SHARE

General

1. There are a significant number of matters that the Water Corporation must consider in issuing a water share under section 33L, section 33M or section 33R, section 33TA, or section 33TB of the *Water Act 1989*. It is therefore advisable that you contact your Water Corporation before you apply for the issue of a water share.
2. Due to caps or limits on the issue of water shares in most systems, applications for the straight issue of a water share under Section 33L are unlikely to be approved (see note 20). This form should only be used for the issue of a water share following the cancellation of another entitlement. The entitlement cancelled may be a water share, an equivalent right in another State or Territory or a bundled entitlement.
3. Any transfers of entitlement facilitated by cancel and issue may be subject to exchange rates. In some cases exchange rate trade may be limited by the volume of trade which has previously occurred in the opposite direction. Refer to the trading rules and contact your water corporation for more details.
4. Please note that applications to vary a water share under Section 33R are administered by cancellation of one water share and issue of another and should use this form. Applications to vary other properties of a water share should use form 9.
5. To associate your new water share with a water-use licence/registration include the WUL/WUR number at Question 5. There must be capacity in the holding limit (twice the annual use limit). The trading zone use, delivery system and Water Corporation attributes of the new water share should reflect the properties of the WUL/WUR. If you do not wish to associate the new water share with a WUL/WUR then it will be classed as disassociated from land. If you are not associating your water share you should list the delivery system for the new water share as NWU and the trading zone use should reflect the trading zone source.
6. If you have an existing allocation account (ABA) with the same Water Corporation, trading zone source and trading zone use attributes, you may choose to link your new water share to it by inserting the ABA number at Question 6. Alternatively if your nominated ABA is not already linked to a water share or WUL/WUR then the Water Corporation will vary the ABA attributes as required. In all other cases if you are concerned that the attributes on your ABA do not reflect the attributes of the new water share or associated WUL/WUR then it is advisable to contact your Water Corporation.

Lodgement

7. If you are applying for the issue of a water share upon the cancellation of a bundled entitlement (for example a supply by agreement), this application should be accompanied by a separate application for cancellation of the bundled entitlement.
8. If you are applying for the issue of a water share upon the cancellation of an interstate entitlement, you must attach evidence of its cancellation.
9. If you are applying for the issue of a water share upon cancellation of another water share, this application should be accompanied by a separate application for cancellation of a water share.
10. You must complete the *Issue of a Water Share* application form and lodge the completed form together with payment of the application fee with the Water Corporation over the counter or by mail. If you are also submitting an application to *Cancel a Water Share*, only one fee will need to be paid.
11. The Water Corporation will not accept:
 - Photocopied forms as the application number must be unique
 - Faxed or emailed forms as original signatures are required
12. Application forms and the schedule of application fees can be obtained from your Water Corporation or at <http://waterregister.vic.gov.au/about/forms-and-fees>

Signatures

13. The applicant(s) to sign the application should be the people who will be recorded as the owner(s) of the water share. The owner(s) will be required to sign for all future transactions such as transfer of a water share, division of a water share, consolidation of a water share and cancellation of a water share.
14. If a new Allocation Bank Account (ABA) is required, the people to sign as the owner(s) of the water share will be the only people able to buy/sell water allocation. To authorise an agent to buy/sell water allocation on the owners' behalf, an application form authorising an agent to trade water allocation will need to be completed.
15. If a water share owner is a company, Annexure 4 must be completed. Signature(s) are required in accordance with an ASIC company extract not more than 12 months old which must be attached to the application.
16. If associating a water share and the owners of the water share are not recorded in the water register as owners of the land with which the water share is being associated, the application must be accompanied by a 'related parties' statutory declaration and 'consent of land owner form' available at <http://waterregister.vic.gov.au/about/forms-and-fees> or from your Water Corporation.

Water Share Proposed Ownership Structure

17. The manner of holding refers to the way in which a person or a legal entity owns a water share. (Hereafter any reference to 'person' includes legal entity). A water share can be owned by one person or it can be owned by two or more persons:

Sole Owner: Is where only one person owns the water share.

Joint Owners: Is where two or more persons own a water share as joint owners. On the death of one joint owner the whole of the water share remains with the surviving joint owners.

Tenants in Common: Two or more persons can own water shares as tenants in common. For example Farmer A as to 1/2 water share and Farmer B as to 1/2 water share. A tenant in common can sell their portion (1/2) without the approval of the owners of the other portion(s). If the person dies their portion passes either in accordance with their Will, or in accordance with the laws of intestacy should they die without a Will.

Tenants in Common may Own their Portions as Joint Owners: Multiple persons may own a portion of a water share. For example, in a share divided into two portions Farmer A and Farmer B may own 1 of the 2 portions (1/2) as joint owners, and Farmer C may solely own the other portion (1/2). This ownership structure would be expressed:

• Farmer A and Farmer B as joint owners of 1/2 of a water share are tenants in common with Farmer C who also owns 1/2 of the water share.

If Farmers A and B wanted to own their portion as tenants in common, the fractions would need to be re-expressed as:

• Farmer A has 1/4 water share, Farmer B has 1/4 water share, and Farmer C has 2/4 water shares as tenants in common.

For each portion, the size must be recorded (expressed as a fraction), the sole owner or multiple owners named, and their manner of holding expressed. A common denominator must be used for the shares held by the tenants in common.

Share portions may be unequal but in all cases the fractions must add to 1. If a portion size is not provided in the application the portions will be considered equal.

Disclaimer: This explanation of the 'manner of holding' does not constitute legal advice. You may require legal advice to determine your requirements.

Approval of the Application

18. If the Water Corporation approves the application, the Water Corporation will record the issue of the water share on the water register.
19. The Water Corporation will send a letter to the person listed first in the water register, advising that the water share issue has been approved and recorded in the water register. Attached to the letter will be a water share copy of record. A copy of the letter will also be forwarded to the lodging party (if applicable).

Refusal of the Application

20. If the Water Corporation refuses the application, the Water Corporation will send a letter to person listed first in the water register stating the reasons for the refusal. A copy of the letter will be forwarded to the lodging party (if applicable).
21. After refusal, if the applicant chooses to apply again a new Issue of a Water Share application form would need to be lodged with another application fee.
22. The Water Corporation will not be able to issue the water share if:
 - i. The water share is not being associated with a WUL or WUR and the issue of the share would cause the non-water user limit to be exceeded for the class of water share and water system to which the water share belongs;
 - ii. The issue of the share would be in conflict with any approved management plan for a water supply protection area;
 - iii. The issue of the share may result in the permissible consumptive volume for the proposed associated water system being exceeded; or
 - iv. The issue of the share would be in conflict with any relevant bulk entitlement.

More information required

23. If the Water Corporation requires more information a letter will be sent to the person listed first in the water register and to the lodging party (if applicable). The letter will make clear the missing information and/or incorrect information that requires correction.
24. Applicants must provide missing information or correct information within two calendar months or the Issue of a Water Share application will lapse, and a new application would need to be lodged with another application fee.

Note: A reference in these notes to action to be undertaken by the Water Corporation may mean the Water Corporation is acting as delegate of the Minister under section 308 of the *Water Act 1989*.
